
	<p>EMERGENCY MEASURES RADIO GROUP</p>
	<p>OTTAWA ARES</p>

Two Names - One Group - One Purpose

Logging

Course Introduction

Course Number: EMRG-407

Course Name: LOGGING

Self Study: YES

Instructor Led: YES

Prerequisites:

- Student must be able to hear and (write/print legibly or type)

What You Should Learn From This Course:

- Logging is easy, just write stuff down – but what is important, and how do you get it all down so fast?
- Why couldn't we do this with an MP3 recorder?

Why?

Before looking at what or how to log, **why bother logging?**

- The log is your memory. You don't have to remember all the minutia that comes out your 'phones. Your boss at the site wants that one piece of information of all you hear in a day. – The one that *you logged* two hours ago.
- Logging provides continuity over operator changes.
- It also lets you keep straight the sequence of events, and the times. If you can't remember when you last checked the progress of the food truck, check your log.
- It may be needed to replace lost parts of someone else's log that got soaked or blew away.
- In some cases the info may be required for future reference, whether in a legal proceeding, or just a debrief session after the event.

Why not just use a recorder?

Recorders are OK for recording, but not for accessing a part of the event log quickly.

- Suppose you have 36 hours of MP3 file from an event. It's been a while since you heard from VE3XYZ.
- When did you last hear them? Where were they?
- How do you find that information in an audio recording?
- **AN AUDIO RECORDING IS AN EXCELLENT SUPPLIMENT TO A LOG, BUT DOESN'T REPLACE IT**

Logging (not the knocking down trees kind)

- If you are really lucky, there will be two people at a station, one logging and one operating the radio.
- Maybe you will also have a runner, to get messages to their intended recipient at your location.

Operator

Logger

Loggin

g

- Unfortunately, at events and even some exercises, you are by yourself.
- When that happens you run the radio, log and pass traffic to the person that needs the info in the first place.
- In the real world, you are all by your self, and you feel like that circus guy who keeps the plates spinning.

**YOU:
OPERATOR,
LOGGER AND
MESSAGE
RUNNER**

- If you can do it all by yourself, it will be a breeze if you get some help.

- All you have to do is write down the important stuff.
-Easier said than done...

FACTS FIRST

A LOG IS ALL ABOUT FACTS

-The trouble is.. What's a fact?

Dictionary definition:

Something known to be done or have existed.

-Known by whom?

- If you saw it, it's a fact. Log it.
- If the person you work for says it, it's a fact as far as the log is concerned. Log it.
- If it sounds like a fact on the radio, it *probably* is,
- so log it.
- Most questions are facts in disguise, or need the question to make sense of the answer. – Log them too.

EXAMPLES -

- Sally Shelter says she needs 500 blankets by 17:30 (from Sally)
- George at the generator needs 50 litres of fuel by 21:00 (From George's radio operator)
- Weather network says 50 cm of snow to fall in next 24h
- VE3ABC from VE3XYZ (no answer)
- Has anybody seen Captain Majors recently?
- What is the supply truck route?

Non Facts – don't bother logging:

- “Looks like it'll rain here soon”
 (“It's raining”, or “It's not raining” are facts)

- “Two guys walk into a bar. Third guy says I bet that hurt”
 (A non loggable exchange, and a waste of net time too.)

Gray Areas

- Log if there is time
- **“When does shelter 1 close?”**
“I don’t know, I’ll check”
- You might log the question just to ensure it gets answered eventually.
(When they get a time, you get a fact you can log)
- There will always be lots of gray. There is no such thing as logging too much. There practical limit is the amount of time you can devote to the process.

What to Ditch – Assuming you aren't at Net Control

- Anything that does not involve your location
 - George needs 50 litres of fuel by 21:00

What to Keep – Assuming you aren't at Net Control

- Things that your boss at the location might want to know later – “What is the supply truck route?”

HOW TO LOG – If it's worth logging, it's worth doing right

- Log the **TIME** of the exchange, in **LOCAL, 24 hour** time,
- Log **WHO** said it. and **WHO** they said it to.
- Make sure you can tell which of the two was sending. Use “traffic for net control” as your default, as you will usually find that is the case for more traffic than anywhere else.
- Log **WHAT** they said, not word-for-word, just what the facts were.
- Log **WHETHER** an item is “open” or resolved. a check mark will do.
- By coincidence, we happen to have a form for all that stuff.

KEEP IT READABLE

- If you can type, and have the means to do so, great. Just remember that you need a hard copy on site, so you need a printer as well as a computer before you are ready to type your log. A manual typewriter is fine.
- Don't erase. Cross things out if you have to make corrections. Just put a line through the junk. Use a pen rather than a pencil if you can.
- If you can't write legibly, then print. If you can't print legibly, then trade jobs with someone who can.

KEEP IT READABLE

- On one page print the alphabet and numbers 0-9 so we can tell “Ss” from your “5s” and your “ls” from your “Is” (and don’t use Arial (this font) if you are typing your log)
0123456789 abcdefghijklmnopqrstuvwxyz ABCDEFGHIJKLMNOPQRSTUVWXYZ
- If you can’t tell one character from another except for context, consider practicing the way you write certain characters.
- If you can’t write fast enough to keep up, use abbreviations and work on your short term memory. Fill in the details after. Leave a space below each line to put in the final version. Don’t be afraid to use up the paper.

A little practical example..

- The following is a weather bulletin. See how much of the information you can get down on paper...
- Just to make it easy, assume you are only interested in Alexandria.

So...

- What is the low tonight?
- How much snow is Alexandria expected to get?

Text:

- Environment Canada has updated a severe weather bulletin for Southern Ontario at 6:37 PM Eastern standard time Sunday December 16 2007.
- A winter storm warning is continued for Westport, Charleston Lake, Merrickville Wolford, Kemptville, Ottawa North Kanata, Orleans, Ottawa South Richmond Metcalfe, Gatineau, Prescott and Russell, Morrisburg, Long Sault, Cornwall, Lancaster, Winchester, Newington, Maxville, Alexandria, Plevna, Sharbot Lake, Western Lanark County and Smiths Falls, Perth, Eastern Lanark County.
- A winter storm warning is continued for Bancroft, Hastings Highlands, Denbigh, Barry's Bay, Kilaloe, Renfrew, Arnprior, Calabogie, Petawawa, Pembroke, Cobden, and Deep River, Whitney, Eastern Algonquin Park.
- Weather Conditions at 8 P.M.
- Ottawa Temperature -12. Relative humidity 94% Wind NNW 15 km/h Wind-chill -19 Barometric pressure 99.31 kPa and falling.
- Gatineau Temperature -12. Relative humidity 91% Wind North 17 km/h Wind-chill -19 Barometric pressure 99.33 KPa and falling.
- Kemptville -12 Wind N 15 KM/h Bancroft -13 Wind N 17 gusting to 31 km/h.
- The environment Canada Forecast for City of Ottawa, Gatineau, Prescott and Russell, Morrisburg, Long Sault, Cornwall, Lancaster, Winchester, Newington, Maxville, Alexandria, Merrickville Wolford, Kemptville, Westport, Charleston Lake, Smiths Falls, Perth, Eastern Lanark County, Plevna, Sharbot Lake, Western Lanark County.
- Winter storm warning in effect. For tonight snow at times heavy ending overnight then cloudy with 60% chance of flurries. Amounts 10 to 15 CM. Blowing snow. Wind NE 40km/h gusting to 60 becoming NW 20 this evening then becoming light overnight. Temperature steady near -12
- For Monday cloudy with 60% chance of flurries early in the morning. Clearing in the morning. Local blowing snow in the morning. High -10. For Monday night a few clouds. Low -17.
- Extended forecast:
- Tuesday a mix of sun and cloud. High -10. For Wednesday periods of snow. Low -10 high 0.
- For Thursday a mix of sun and cloud. Low -8 high 0. Normals for the period Low -12 high -3.

- 308 words in 3:24 = Just over 90 WPM
- This is **SLOW** compared to normal speech.
- Trained communicators
(That's supposed to be you) **SLOW DOWN**
when someone is trying to write.

- **Sunday December 16 2007.**
- **A winter storm warning is continued for... ...Alexandria...**
- **Winter storm warning in effect.**
- **Tonight snow at times heavy ending overnight then cloudy 60% chance of flurries.**
- **Amounts 10 to 15 CM.** ←
- **Blowing snow.**
- **Wind NE 40km/h gusting to 60.**
- **Becoming NW 20 this evening then becoming light overnight.**
- **Temperature steady near -12**
- ----- ←
- **Monday cloudy 60% chance of flurries early morning. Clearing in morning. Local blowing snow in morning. High -10.**
- **For Monday night a few clouds. Low -17.**
- **Extended forecast:**
- **Tuesday sun and cloud. High -10.**
- **Wednesday periods of snow. Low -10 high 0.**
- **Thursday sun and cloud. Low -8 high 0.**

This is a lot fewer than 308 words

Practice:

- Try to write down the weather report.
- Listen to a “Yak” net
 - Start by just copying names and callsigns
 - Then try writing down any “facts” that go by
- Listen to the Swap net, part of the Capital City net on Mondays, 20:00L on VE2CRA, 146.940-
 - Try copying every item listed.
 - If you can't keep up, try every second one.

A short Pause..

The fun part follows...

Questions so far?

AN EVENT

- The next audio is 15 minutes from an event (Tour Nortel)
- The audio is time compressed, meaning that things happen faster than in real time.
- Log it.
- (There is a quiz at the end)

(4)

- NC:RADIO CHECK VA3UNK OK
- NC:RADIO CHECK VE3ANO OK
- VA3UNK: SUPPLY TRUCK UNLOADING
- CP1: NORTEL CREW WITH THE BUS SETTING UP
- VA3UNK: RADIO CHECK OK
- VE3BSM: RADIO CHECK OK, RUNNING ON LOCAL REPEATER
- CP2: NORTEL ERT RADIO WORKING OK @ CP2
- BASKINS BEACH: ERT HERE
- BASKINS BEACH: WHEN DOES 60K START? ADVISE WHEN THEY GO THROUGH
- NC: 60K STARTS 09:00 30 k STARTS 09:30
- CP2: SOME CYCLISTS HAVE LEFT CARLING, 1ST 2 ARRIVED @ BASKINS BEACH
- VA3DB: CONFIRMS SEEING CYCLISTS ON CARLING
- CP1: WHICH WAY SHOULD TRAFFIC BE TRAVELLING ON HERZBERG?
- VA3DB: HERZBERG TRAFFIC GOING WRONG WAY, DIRECTED SOUTHBOUND, NOT NORTHBOUND
- CP1: NORTEL IS HAVING POLICE CHANGE TRAFFIC NORTHBOUND
- VE3URL: TRAFFIC DIRECTION CHANGED. 1ST CYCLISTS LEAVING NOW
- NC: TIME 09:02
- CP1: 1ST CYCLIST THROUGH
- CP2: AMBULANCE ARRIVED, HAVE NORTEL RADIOS, MAY USE THEM INSTEAD OF US, WILL BE GOING OUT ON COURSE PERIODICALLY, WILL INFORM US WHEN THEY LEAVE
- VA3DB: 2 CYCLISTS ON 6TH LINGE NEARING VANCES ROAD NOW
- CP1: ADVISE CP3 FIRST CYCLISTS THROUGH (ALREADY HEARD)
- VA3DB: RADIO CHECK (NO COPY) ,IMPROVED, NOW OK
- CP1: FIRST BUNCH OF CYCLISTS THRU CP1
- CP3: REMINDER, LOOK FOR CYCLISTS WITH NUMBERS
- VE3URL: REMINDER, BIBS MAY BE UNDER JACKETS, BRING ANY INCIDENTS TO ATTENTION OF NET
- NCS: 30K CYCLISTS STARTED
- VA3DB: FIRST TWO THRU VANCES SIDE ROAD
- CP3: 2 CYCLISTS AT CP3, STOPPING FOR A FEW MIN.
- BASKINS BEACH: SPECIAL EVENT SECURITY VEHICLE ARRIVED @ CP3
- VA3DB: SECURITY VEHICLE LEFT VANCES, WANTED TO ENSURE CYCLISTS WERE STOPPED FOR TRAFFIC
- NC: CP3, MAKE CONTACT WITH SECURITY, LET THEM KNOW WHO YOU ARE
- CP3: FIRST 2 CYCLISTS OUT OF CP3, GOING TO VANCES
- CP3: SECURITY VEHICLE HAS LEFT CP3
- CP2: DO WE GET BBQ TICKETS AT FINISH, OR FEND FOR OURSELVES FOR LUNCH?
- VE3URL: RETURN TO OARC BOOTH AT FINISH. VOLUNTEERS ARE ENTITLED TO FOOD AT FINISH.

Quiz?

- What callsigns and tactical callsigns were heard?
- Where were they?
- What is the last known position of ERT and security?

CALL	TACTICAL CALL	LOCATION
VE3RC	Net Control	Nortel
VA3UNK	Baskin Beach, CP3	Baskins Beach
VE3ANO	No tactical call given	Behind tents
no call given	CP1	Hertzberg Rd and Carling
VA3DB	No tactical call given	Vance's side road
VE3URL/	No tactical call given	Nortel
VE3BSM	CP2	No location given
ERT @CP2,3	Security OUT OF CP3 Going down the course	

Questions / Discussion

- I can't write that quickly, now what?
- I try to write stuff down, but somebody is calling me. What do I do first?
- I could read this an hour ago, but now I can't make heads or tails of it.
